WORK EXPERIENCE

Engineer Intern

Moviro - Monterrey | Mexico

Current job. I'm playing a role as a **Python Backend Developer**, leveraging various design patterns and architectural paradigms. Additionally, I superheaded the establishment of a cutting-edge AI area within the company. In this role, I experienced technologies such as Langchain, Numpy, Pandas and Flask.

Furthermore, my journey in Moviro started as a **Fullstack Developer** using technologies such as .NET for the backend and Angular for the frontend.

2023 -

IT Support Specialist

TecMilenio Las Torres - Monterrey, Mexico

I played a role as a **Software Developer** for smalls softwares for a short area of Security I created a Software in PowerBI where they can visualize incidents that happen in TecMilenio. Also, I created a webpage for them using SharePoint so everyone at TecMilenio can see.

2022 - 2023

STUDENT ASSOCIATIONS

TecMilenio Las Torres - Monterrey, Mexico

Enactus - Group

We are a group of leaders who want to undertake and innovate. My team and I got 3rd place in a National competition making a small robot programmed in Python to detect how full a garbage trashcan was.

SQUAD IT - Group

A small group of programmers that made teams to compete in different hackathons such as school hackathons and international hackathons.

MAIN PERSONAL PROJECTS

TODO APP - API -Python

A small api made by me while practicing and using the best architectures. I used this stack Python, Flask, SQLAlchemy, PostgreSQL.

FRONTEND CRM - Angular

A small frontend using Angular to practice.
